

STABBED TO DEATH IN JACKSON WARD

Colored Woman Arrested on Belief That She Took Part in Lovett Murder.

VISITORS ALSO ARRESTED

Dr. A. B. Cosby and Arthur Griffin in House When Killing Occurred.

Involving in other charges two white men, one a physician, Clara Henley, a colored woman, alleged by the police to have operated an illegal resort at her home, 1206 St. Paul Street, was arrested yesterday morning by Detectives Adkinson and Krenzel and Policemen Dunn Smith and Nash, in connection with the murder of James Lovett, also colored.

Lovett was stabbed in the arm, and, though the wound in itself was not necessarily fatal, he literally bled to death before her eyes. The city ambulance was summoned, and Dr. Watson, who arrived on the scene, found Lovett was cold in death, having been dead, evidently, for some time. He was found lying in a pool of blood. Roy Ford, the ambulance driver, left Dr. Watts at the house and went in search of a policeman. He drove the car as far as Poushes and Brond streets, and there found Detective Atkinson. They raced back, and the detective placed the woman under arrest. Detective Krenzel was called, and the patrolmen were summoned, and an investigation of the killing was immediately begun. The Henley woman is said to have declared that Lovett was about to beat her when she plunged a long knife into his arm.

Physician Arrested.
Dr. A. B. Cosby and Arthur Griffin were in the house at the time. They were arrested by the same officers several hours later, on charges of conspiracy. Dr. Cosby was bailed in the sum of \$500, and has employed Gilbert K. Pollock to defend him. Griffin had not been able to secure bail. Wesley Yates, colored, was arrested on a charge of being disorderly in the house, and is also being held as an important witness against the Henley woman.

Clara Henley has long been regarded by the police as a woman of bad repute, and it was stated yesterday, for three years, they have endeavored to obtain evidence against her sufficient to warrant an arrest.

Dr. Watts arrived she is alleged to have pointed to the dead negro and to have said: "There he is. Treat him. He's sick." But Lovett was beyond medical aid.

Life Could Have Been Saved.
Mary Harris and Serena Brown, the colored women who were charged on charges involving the two white men, are also alleged to be characters of bad repute. It is further alleged by the police that when Lovett was stabbed Dr. Cosby fled from the house. Had temporary bandages been applied, it is said, Lovett's life would have been saved.

Dr. Watts arrived she is alleged to have pointed to the dead negro and to have said: "There he is. Treat him. He's sick." But Lovett was beyond medical aid.

FEDERAL COURTS OPEN

Usual Fall Term Begins This Morning.

The fall term of the United States District and Circuit Courts will be opened to-day by Judge Edmund Waddill, Jr. It is probable that little will be done, as it is only expected that the docket will be called by the court. Tomorrow, however, the grand and petit juries have been summoned. It is understood that many presentments will be made to the grand jury.

Among other things the cases of corporations which failed to pay their excise tax to the Internal Revenue Department will be taken up. These matters of those concerns which made no attempt to compromise have been placed in the hands of the district attorney for action.

A few cases of violations of the liquor and postal laws will also be considered.

Two Grand Cruises "Around the World"

Two cruises of about three and one-half months duration, "Around the World," the first to leave from New York on October 21, 1911, and the second from San Francisco on February 4, 1912. These cruises will be made by the large new transatlantic liner "Cleopatra." The rates will be from \$50.00 up, including shore excursions. Places visited on first cruise: New York, Madeira, Gibraltar, Naples, Port Said, Suez, Bombay, Colombo, Calcutta (Diamond Harbor), Rangoon, Singapore, Manila, Hong Kong, Nagasaki, Kobe, Yokohama, Honolulu, San Francisco. Second cruise in reversed order. Call for booklet.

UNCONSCIOUS IN ELEVATOR SHAFT

Walter Graves Fell Saturday Night and Regained His Senses Sixteen Hours Later.

FIRST CALLED FOR TAXICAB

Injured Man Was Then Driven to Doctor's and Removed Later to Hospital.

Lying unconscious for sixteen hours at the foot of an elevator shaft in the plant of the National Packing Company, 1011-1013 East Canal Street, Walter Graves, twenty-one years old, of 119 South Fourth Street, recovered his faculties yesterday morning, telephoned for a taxicab and ordered that he be driven to the home of Dr. Herbert Mann, despite the fact that he was suffering from a fractured skull. It did not occur to him until he was taken to the hospital that the young man was dangerously hurt, and he hurried him to the Memorial Hospital. His condition last night was said to be serious.

Graves was employed as a clerk by the packing company. He was practically alone late Saturday afternoon. He had occasion to use the elevator, and went to the door on the ground floor to enter the lift. The door was open, and not seeing that the elevator was resting at the second floor, he stepped into space. He fell a distance of between twelve and fifteen feet, and evidently plunging head first, he broke his skull and received other serious injuries.

Rendered Unconscious.
He was rendered unconscious by the fall at 5 o'clock yesterday morning did not regain his senses.

Graves glanced about and discovered that he had been lying upon a concrete floor, partially filled with water. His clothing was wet through and through, and he suffered terribly from his wounds. However, he managed to drag himself from the shaft and reach a telephone in the office. Then he summoned a cab, and when it arrived directed that he be taken to the office of Dr. Mann in East Franklin Street.

Surgeons and physicians worked over him nearly yesterday afternoon, but he had been taken to the hospital, and while his injuries may not prove fatal, it was, nevertheless, said that he was in a critical condition.

The accident was witnessed by no one, and none knew of his disappearance until he was found by a person who was about who would have been to discover the injured man at the foot of the shaft. Yesterday being Sunday, the place remained deserted, and resulted in Graves having to care for himself upon recovering consciousness.

TEN NEGROES CAPTURED

Alleged Gun Shooters Caught in Raid on East Franklin Street.

Ten negroes, alleged gun shooters, were captured last night in a raid made on the house, 2109 East Franklin Street, by Officers Duffy, McGowan and Bosquet. They were taken to the First Police Station, and will be given a hearing this morning before Justice Crutcher.

Robert Munday (colored) was locked up on a charge of feloniously assaulting Thornton Rone.

Two negroes, Delaware Bradley and Ross Davis, were arrested on charges of carrying concealed weapons. Davis was said to have a revolver in his possession, while Bradley was accused of carrying a pair of brass knuckles.

CHARLES PAGE BRYAN

Minister to Portugal Spends Day at Jefferson Hotel.

Colonel Charles Page Bryan, envoy extraordinary and minister plenipotentiary to Portugal, was registered at the Jefferson yesterday, and spent the day in the city. Colonel Page attended the University of Virginia in 1877-79, and received the degree of LL. B. from George Washington University in 1879. His residence was formerly in Colorado, where he was prominent in politics. Since 1879 he has been in the diplomatic service representing this country in Brazil, Switzerland, China, Brazil, Switzerland, Belgium and Portugal.

Condition Still Serious.

It was said last night at the Memorial Hospital that the condition of Mildred Petross, the nine-year-old girl who was run over by a freight car Friday night at Venable and Mosby Streets, was improved, though she was still in a dangerous condition.

Captain Blake in Town.

Captain and Mrs. Thomas B. Blake, formerly of Virginia, but for many years residents of Memphis, Tenn., are in the city visiting Mrs. Blake's sister, Mrs. Bullington, 18 South Harrison Street. They are spending a few days in the Old Dominion, where both have many friends, and for both of whom the memory of the State holds many memories.

Captain Blake was commander of Company E, Tenth Battalion, Virginia Artillery, which figured prominently in Lee's famous retreat to Appomattox. Mrs. Blake before her marriage was Miss Madeline Le Moine, of Peterburg.

PAINT DEALERS READY FOR WORK

National Association Members Arriving for Annual Convention To-Morrow.

MANY SOCIAL FEATURES

State and City Officials Will Cordially Welcome Delegates at Jefferson.

All is in readiness for the twenty-fourth annual convocation of the National Paint, Oil and Varnish Association, which convenes at the Jefferson Hotel to-morrow morning for a four days' meeting. Preliminary programs which are out show an elaborate schedule of business sessions and social functions, which will occupy every hour of the busy four days that the visitors will spend in Richmond.

Lacking a local organization of paint dealers, the whole convention is being engineered from headquarters in New York. Arrangements for the Richmond convention were worked out by the national organization's committee of Harry J. Schnell, chairman, of New York; D. W. Piggis, of New York, and H. M. Clements, of Philadelphia. The committee has taken especial pains to provide for the entertainment of the women delegates, and curricula and entertainments having been planned for their benefit. A number of special parties coming from a distance have been arranged for. Several of these arrived in the city last night.

Addresses of Welcome.

The convention will be formally opened in the Jefferson Auditorium at 10 A. M. to-morrow with addresses of welcome by city and State officials, and with responses on behalf of the delegates by Governor J. Taylor, Mayor D. C. Harrison, Henry W. Wood, president of the Chamber of Commerce; John B. Young, Walter D. Foss, vice-president of the Paint, Oil and Varnish Association, and other members of the association. Afternoon and evening business sessions, with addresses on questions of interest to the trade, will be held daily until the close of the convention Thursday.

Elaborate preparations have been made for the social part of the Richmond meeting. First on the program of entertainment is a luncheon at the Country Club of Virginia, followed by an entertainment in honor of the visiting women. A trip to the city will be provided at the hotel, and the hotel for the conveyance of the guests to the Country Club. Following this will be a reception in the parlor of the Jefferson at 8 in the evening, tendered by President and Mrs. Louis T. Minehart, of the Paint, Oil and Varnish Association.

Many Social Features.

Wednesday's entertainment will consist of visits to the Valentine Museum, a golf tournament at the Country Club, and a reception in honor of the delegates and visiting women. On Thursday, a reception in honor of the visitors given by Governor and Mrs. William Hodges Mann at the Executive Mansion. For Thursday are scheduled visits to the Confederate Museum, automobile excursions for the women, and a final banquet in the evening at the Jefferson.

The final business session will take place Thursday at 2 P. M. The Richmond convention will come to an end Friday with a trip to the James on the steamer Pocahontas, which will be made from the dock at 9:30 A. M., the steamer going as far down as Westover and returning to the city at 4:30. Luncheon and refreshments will be served en route, and Polk Miller and his party will be given an entertainment for the excursionists.

Between two and three hundred, it is expected, will attend the Richmond meeting. The association is nationwide in its scope, and some of the most important business in the paint and oil industry will be done at the meetings. Especially large delegations are expected from New York, Philadelphia, Baltimore and other Eastern manufacturing centers.

ASKS FOR ADVICE

Committee on Printing Has Two Bills for New City Code.

Another bill will be made to-night by the Council Committee on Printing and Claims to secure a quorum, the last two attempts having failed. The long-awaited city code has at last been issued, but the city has not paid the bill. Several attorneys wish to be heard before the committee, as there are conflicting claims. The bill was awarded to the Capitol Printing Company, which went into bankruptcy. G. H. Brothers, who had the lynchpin subcontract, took over the work and completed the book, and claim payment, and the amount is also claimed by the creditors of the bankrupt Capitol Printing Company. The committee has asked the City Attorney's advice as to the manner of payment.

Another matter to come before the committee to-night is the long-lost volume of annual reports. Completed in February and submitted by the Mayor to the March meeting of the Council with the annual message, the volume has not yet been issued, though six months have elapsed. It is reported that one or more departments submitted to the Mayor a mere skeleton of their annual reports and have since supplied the printer with additional copy. Many of the departmental reports have been issued in pamphlet form, but the bound volume of collected reports, of great value to all those having business with the city, is indefinitely delayed.

Jefferson Hotel Arrivals.

T. J. Wilson, Chicago, Ill.; Raymond Deane, New York; Thomas M. Myers, New York; E. M. Garson, New York; Thomas L. Zimmerman, Frederick, Md.; Mr. and Mrs. Harry Schnell, New York; George R. McDonald, Syracuse, N. Y.; H. T. Willard, Chicago, Ill.; E. Rosenthal, Chicago, Ill.; J. G. Staton, North Carolina; L. R. Walker, Chevy Chase, Md.; Dr. and Mrs. MacNaughton, Hamilton, Ont.; W. E. Loon, J. S. Detroit; Mr. and Mrs. A. T. Moulton, New York; Ferd. L. Richard, New York; Leon Aleson, New York; Mr. and Mrs. W. D. Norton, Raleigh, Va.; Thomas B. Scott, Burkeville, Va.; A. T. Todd, Atlanta, Ga.; Miss Lillian Todd, Atlanta, Ga.; W. H. Fleming, Chicago; Colonel Charles Page Bryan, Chicago.

VISITING GIRLS GIVEN EVERY AID

Bureau at Railway Stations Helped Many Strangers Who Were Lost in City.

ONE DELIVERED TO POLICE

Young Women's Christian Association Ready to Help Lost Ones During Fair Week.

For the purpose of making the visit of out-of-town girls and women at the State Fair as free as possible from the petty inconveniences that are likely to confuse and annoy them during the strenuous week, the Traveler's Aid Department of the Young Women's Christian Association will conduct a bureau of information at the Fair Grounds. At this booth visitors will be able to find city, hotel and boarding-house directories, railroad time tables, street car schedules, as well as much interesting information bearing on the life of working girls in the city.

This department of the association is rapidly growing in importance, and considering the limitations under which it is forced to operate, is doing a work not done by any other organization in the city. It has rendered valuable service to hundreds of girls coming to the city in search of work, assisting them to find employment and helping them to bridge the gap between the loss of one position and the finding of another.

Helped Many Strangers.

The Traveler's Aid work of the summer, while of the usual variety, was largely augmented this year by the tourist traffic, occasioned by the numerous excursions which afforded many opportunities for help to strangers within the city. Among the services performed for these by the aid committee were: Directing to boarding-houses and hotels, assisting to transfer to other stations, administering to the sick and helpless, assisting in the location of lost children, helping girls to find their relatives and friends who through misunderstanding had failed to meet them and in many other ways too numerous to mention. The report for June, for example, shows that twenty-five girls, thirty women and seven invalids were assisted, 100 calls made and positions found for eight.

The following cases taken at random from the records of the committee are typical: A little girl failed to find her mother, who was unable to make the proper connection and had to spend the night in Richmond. Her father had provided her with plenty of money, but girl-like, she had reserved only 50 cents out of the sum for emergencies. She was taken care of for the night and placed on the night train the next morning.

In another instance, a girl who comes daily to her work in the city was persuaded to accept the hospitality of the society when she found that she had missed the early train home and would have to wait until 11 o'clock for another.

Gave Her Over to Police.

A young runaway sister was taken to the emergency room for the night. Subsequent investigation proved that she was herself the one that was wanted by the police for enticing a younger girl to Richmond, and was promptly turned over to the chief of detectives. At another time two girls were permitted the use of the emergency room for several nights until they found employment.

September proved a busy month for this department of association work. Fifteen applications were received for employment, and from five to ten calls a day for direction to lodging places. Numerous calls were received for aid to women and girls at the various railroad stations. The association is experiencing difficulty in taking care of this phase of its activities with only one worker, and hopes to be able to add to its efficiency by securing assistance. The Traveler's Aid Department is at present in charge of Mrs. C. H. Urner, chairman; Miss Constance MacCorkle, general secretary, and Miss Helen E. Beardsley, secretary.

Held for Stealing 5 Cents.

Matthew Raymond, a colored boy, twelve years old, was arrested yesterday afternoon on the charge of snatching 5 cents from the year-old daughter of E. Helman. Matthew said that he didn't do it. He declared that another boy snatched the money and gave it to him. He was caught in an alley by a citizen and held until the arrival of a policeman.

AVIATOR COMING

Howard Levan to Make Daily Flights at State Fair.

Howard Levan, the boy aviator, who will be one of the attractions at the State Fair next week, wired the association yesterday that he would make two flights every day during the fair. The hours at which these flights will be made will depend to a large extent upon the weather.

"I will take all reasonable chances on wind waves," said Levan, "and hope that we will have fine weather all week."

The youthful aviator also said that he would enter the race on the last day of the fair, with an automobile, to be driven by some one as yet to be selected. This race will prove very interesting, and will prove the ability of the aviator to make the sharp turns at the half and quarter-miles in the race track. The race will be a five-mile around the track.

Where Do You Get Your Ideas?

This question has been so often asked us by our appreciative friends who are kind enough to read our ads that, for the benefit of the public, we are going to tell.

The secret lies in the inspiration derived from the backing of this great and prosperous institution, the

AMERICAN NATIONAL BANK

of Richmond, Virginia

together with the unlimited advantages it has to offer. This is enough to make a dumb man talk, as it has made many heretofore blind men see.

SECURITY AND SERVICE

What more?

NEW PLAN HELPED BY JAIL REPORT

Vonderlehr Workhouse Ordinance Regarded as Best Place for Prisoners.

FARM SCHEME FAVORED

Politicians Begin Guessing Contest as to What City Sergeant Earns.

Great impetus has been given to the plans of Councilman Vonderlehr for establishing a workhouse in or near the city for employment of paupers and jail prisoners and confirmed inebriates by the publication of the report in regard to conditions at the Richmond City Jail, in which attention is called to the fact that strapping, able-bodied negro men there rest in idleness at the expense of the Commonwealth.

It is understood that the State Board of Charities and Correction will shortly make further recommendations to the City Council on the subject, proposing the establishing of a city farm at some convenient location near the city in lieu of the establishment of workhouses. The labor would not interfere with the various organizations which have announced opposition to the Vonderlehr ordinance, and it is claimed that for inebriates and the shiftless element the experience of compulsory labor in the open air would be both healthful and profitable, and that after the labor would of interfere with the various organizations which have announced opposition to the Vonderlehr ordinance, and it is claimed that for inebriates and the shiftless element the experience of compulsory labor in the open air would be both healthful and profitable, and that after the labor would of interfere with the various organizations which have announced opposition to the Vonderlehr ordinance, and it is claimed that for inebriates and the shiftless element the experience of compulsory labor in the open air would be both healthful and profitable, and that after the labor would of interfere with the various organizations which have announced opposition to the Vonderlehr ordinance, and it is claimed that for inebriates and the shiftless element the experience of compulsory labor in the open air would be both healthful and profitable, and that after the labor would of interfere with the various organizations which have announced opposition to the Vonderlehr ordinance, and it is claimed that for inebriates and the shiftless element the experience of compulsory labor in the open air would be both healthful and profitable, and that after the labor would of interfere with the various organizations which have announced opposition to the Vonderlehr ordinance, and it is claimed that for inebriates and the shiftless element the experience of compulsory labor in the open air would be both healthful and profitable, and that after the labor would of interfere with the various organizations which have announced opposition to the Vonderlehr ordinance, and it is claimed that for inebriates and the shiftless element the experience of compulsory labor in the open air would be both healthful and profitable, and that after the labor would of interfere with the various organizations which have announced opposition to the Vonderlehr ordinance, and it is claimed that for inebriates and the shiftless element the experience of compulsory labor in the open air would be both healthful and profitable, and that after the labor would of interfere with the various organizations which have announced opposition to the Vonderlehr ordinance, and it is claimed that for inebriates and the shiftless element the experience of compulsory labor in the open air would be both healthful and profitable, and that after the labor would of interfere with the various organizations which have announced opposition to the Vonderlehr ordinance, and it is claimed that for inebriates and the shiftless element the experience of compulsory labor in the open air would be both healthful and profitable, and that after the labor would of interfere with the various organizations which have announced opposition to the Vonderlehr ordinance, and it is claimed that for inebriates and the shiftless element the experience of compulsory labor in the open air would be both healthful and profitable, and that after the labor would of interfere with the various organizations which have announced opposition to the Vonderlehr ordinance, and it is claimed that for inebriates and the shiftless element the experience of compulsory labor in the open air would be both healthful and profitable, and that after the labor would of interfere with the various organizations which have announced opposition to the Vonderlehr ordinance, and it is claimed that for inebriates and the shiftless element the experience of compulsory labor in the open air would be both healthful and profitable, and that after the labor would of interfere with the various organizations which have announced opposition to the Vonderlehr ordinance, and it is claimed that for inebriates and the shiftless element the experience of compulsory labor in the open air would be both healthful and profitable, and that after the labor would of interfere with the various organizations which have announced opposition to the Vonderlehr ordinance, and it is claimed that for inebriates and the shiftless element the experience of compulsory labor in the open air would be both healthful and profitable, and that after the labor would of interfere with the various organizations which have announced opposition to the Vonderlehr ordinance, and it is claimed that for inebriates and the shiftless element the experience of compulsory labor in the open air would be both healthful and profitable, and that after the labor would of interfere with the various organizations which have announced opposition to the Vonderlehr ordinance, and it is claimed that for inebriates and the shiftless element the experience of compulsory labor in the open air would be
